Storage cabinets, flammable liquids

03

- Complies with Highly Flammable Liquid Regulations, 1972
- Flame baffled ventilation
- Finished in white stove enamel

Manufactured from Durasteel, an incombustible laminated material used extensively for fire doors. Cabinets are fully welded and will not distort. Each unit has fitted spillage trays in base and shelf (where applicable), ensuring that no liquid can seep out of the cabinet. With double doors, lock and keys. 8 and 16 Winchester types have space for Winchesters in base and storage for smaller containers on a shelf.
