Funnels
plastic, conical

Funnels, PMP, conical, filter

Scienceware® Bel-Art Products

Unsurpassed for non-vacuum, high-speed filtration, these clear funnels have internal helicoid ribs to increase the filtration speed of filter paper. Vertical outer ribs prevent airlock. Unaffected by corrosive liquids and heat resistant to 177°C (350°F).

Funnels, polypropylene, conical, powder

A

Kartell

60° angled sides with external ribs avoid pressure lock. Large bore avoids powder bridging during transfer. Autoclavable.
