Respirators, fit test kit

S7

The Moldex Bitrex test kit comprises the following: 2 x nebulisers; 1 x test hood; 6 x vials of Bitrex sensitivity solution; 6 x vials of Bitrex test solution; 2 x spare parts for nebulisers (atomisers); 1 x Moldex qualitative test CD.

One of the major changes introduced to COSHH 2002 with regard to respiratory protection, is the mandatory requirement to 'fit test' wearers of tight fitting respirators.

N.B: One vial of solution will normally be sufficient for 6 tests.
