

# Chromatography

## sample preparation

Our new chromatography section features products from leading suppliers, providing a comprehensive range of columns, accessories and equipment for analytical GC, HPLC, LC, biomolecule separations, including specialist SPE columns and multi-well plates for sample preparation. We also offer a large portfolio of vials and closures designed for all instruments and applications.

### SPE columns and plates, Thermo Scientific SOLA

- Higher levels of reproducibility
- Higher levels of extract cleanliness
- Reduced solvent requirements
- Increased sensitivity

Thermo Scientific SOLA products revolutionise solid phase extraction (SPE). This first fritless SPE product range provides greater reproducibility with cleaner, more consistent extracts. Products provide unparalleled performance characteristics compared to conventional SPE, phospholipid removal and protein precipitation products.

#### SPE columns

| Catalogue No | Legacy No | Alt. No   | Volume, mL | Sorbent mass, mg | Pack qty |
|--------------|-----------|-----------|------------|------------------|----------|
| 11879163     | -         | 60109-001 | 1          | 10               | 100      |
| 11869163     | -         | 60109-002 | 1          | 10               | 100      |
| 11889163     | -         | 60109-003 | 1          | 10               | 100      |

#### SPE 96 well plates, fixed well format

| Catalogue No | Legacy No | Alt. No   | Sorbent mass, mg | Pack qty |
